## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2, 5, 6, 11 and 12 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Walsh (4,911,544).

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 3, 4, 7-10 and 13-22 are rejected under 35 U.S.C. 103(a) as being unpatentable over Walsh (4,911,544) in view of Bioengineering of the Skin: Skin Surface Imaging and Analysis.

Walsh discloses analyzing skin for suggesting cosmetic sales based on images using multiple wavelengths of light. Walsh does not disclose “taking a polarized photograph.”

Bioengineering of the Skin: Skin Surface Imaging and Analysis teaches that in addition to using multiple wavelengths of light polarized imaging of the skin provides useful analysis. It would have been obvious to one of ordinary skill at the time of applicant's invention to provide

Art Unit: 2851

Walsh with polarized light for analyzing the skin. One would have been motivated to so modify Walsh for the benefit of revealing features not shown by other wavelengths of light.

Regarding claims 15-18, it would have been obvious to substitute a digital camera for the Polaroid camera in Walsh. One would have been motivated to so modify Walsh for the benefit of displaying the image on a monitor.

Regarding claims 19-22, it would have been obvious to take the photographs in a "period of less than 30 seconds." One would have been motivated to do so in order to quickly process the customer to increase sales flow and decrease customer dissatisfaction.
